Become a 'Green Company'
- Superior Performance
Better engine lubrication
- Sustainable
Utilizes local recycled waste product
- Available and Convenient
We deliver filtered oil to you!

How it Works

Rudolph Diesel designed the diesel engine to run on plant oils. However, vegetable oil must be thinned before utilization in a diesel engine. Our system thins the oil using engine heat so as to avoid damage to modern engines.

Excavator powered by used veggie oil.

It's as Simple as
Flipping a Switch:

- Start vehicle on fuel
Diesel or Biodiesel
- Warm up the engine
The veggie oil needs to be heated to make it thin enough to run in your engine.
- Switch to veggie oil
When the engine is warm, flip a switch inside the car that changes the fuel source from Diesel or Biodiesel to veggie oil.
- Flush your engine
30 seconds before the vehicle is turned off, flip the switches again to flush the engine. That way you can begin your next journey on Diesel or Biodiesel.

You're ready to begin your next
journey on green fuel!

Filtered Vegetable Oil Delivery To Your Door

- Filtered oil is delivered for \$2.00 per gallon plus tax.
- All oil is filtered to 1 micron nominal and is dewatered.
- We will deliver anywhere in the Atlanta or Athens area, or other locations per special request.
- Minimum 100 gallons per delivery.

We Will Convert Most Diesel Vehicles

- We specialize in:
 - Industrial fleets
 - Mercedes diesels
 - VW diesels
 - Japanese box trucks
 - American diesel pick-ups
